Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the ISB; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the ISB.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US \$0.20 per page, per copy, plus a basic fee of US \$2.00 per article. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0020-7128, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Editor-in-Chief: M. Fulchignoni

Editorial Assistant: S. Perret

Editors: J. E. Weber, G. J. Komen, J. P. O'Kane, H. Le Treut, Y. Fouquart, P. Mascart, S. Tibaldi, M. J. Rycroft, C.-G. Fälthammar, R. A. Harrison, E. Marsch, A. Provenzale

Annales Geophysicae is an international, multi- and interdisciplinary scientific journal covering the following fields:

- physics and dynamics of the oceans and seas, incl. oceanography and marine sciences
- air-sea and air-land-vegetation interactions, incl. physical, chemical and biological processes
- modelling and remote sensing of oceans, atmospheres and climate
- physics, dynamics and chemistry of the lower, middle and upper atmosphere, incl. meteorology and climatology
- physics of ionospheres and magnetospheres of the Earth and planets, incl. atmospheric and heliospheric couplings
- interplanetary and heliospheric physics, incl. solar wind, energetic particles, dust and interstellar gas
- physics and dynamics of the solar atmosphere, incl. chromosphere and corona, emissions and magnetic activity
- physics of the planets, satellites and small bodies of the solar system, incl. cosmochemistry and exobiology
- physics of nonlinear processes in geophysical systems.

Printed on acid-free paper

**The journal on the dynamics
of the global climate system**

Covering all aspects of the global climate system, this journal publishes papers containing original diagnostic, analytical or numerical modeling research on the structure and behavior of the atmosphere, oceans, cryosphere, biomass and land surface as interacting components of this system, as well as contributions focused on selected aspects of climate dynamics on particular scales of space or time.

Papers emphasizing an integrated view of the physical and biogeochemical processes governing climate and climate change are also welcome.

Recent papers:

- Organic carbon accumulation rates in the Holocene and glacial Arabian Sea: implications for O_2 -consumption in the deep-sea and atmospheric CO_2 variations
- The portrayal of the Australian monsoon equatorial shear line by GCMs: enhanced greenhouse scenario implications
- Astronomical frequencies for climate research at the decadal to century time scale
- Origin of July Antarctic precipitation and its influence on deuterium content: a GCM analysis
- The small ice cap instability in seasonal energy balance models

Volume 1

By R.L. Desjardins, R.M. Gifford, E.A.N. Greenwood,
T. Nilson

1992. X, 157 pp. 34 figs. Hardcover DM 118,-
ISBN 3-540-53843-7

The new series, **Advances in Bioclimatology** provides authoritative reviews on the latest developments in all research areas concerned with the effects of climatic factors on living organisms - be they plants, animals or humans. The emphasis is clearly laid on the mechanisms - rather than on the statistical relationships - linking biological processes with their physical environments.

The following topics are covered in the first volume:

- Deforestation, revegetation, water balance and climate;
- Interaction of CO_2 with growth limiting environmental factors in vegetation productivity;
- Radiative transfer in nonhomogenous plant canopies;
- Techniques to measure CO_2 flux densities from surface and airborne sensors.

Future volumes will include reviews of frost, its occurrence, impact and prevention (Vol. 2); laser remote sensing of vegetation; global monitoring of forests with radar; human melanoma and ultraviolet radiation; maintaining health of farm animals under adverse conditions.

Volume 2

The Bioclimatology of Frost Its Occurrence, Impact and Protection

By J.D. Kalma, G.F. Laughlin, J.M. Caprio, P.J.C. Hamer

1992. XVII, 144 pp. 29 figs. Hardcover DM 118,-
ISBN 3-540-53855-0

The second volume of the new series **Advances in Bioclimatology** provides a comprehensive treatment of the physical aspects of frost occurrence and frost distribution, the biological and phenological aspects of frost damage, as well as the various direct and indirect methods of frost protection and prevention. It combines extensive reviews with detailed, illustrative case studies, the latter dealing with plant temperatures during frost, numerical models for frost prediction and mapping, regional frost risk mapping techniques, winterkill of wheat, and a model for frost protection by sprinkler irrigation. The book is of interest to researchers and students, but also of practical use for farmers and horticulturalists.

What does chronobiology have to do with modern medicine and research?

Y. Touitou · E. Haus (Eds.)

Biologic Rhythms in Clinical and Laboratory Medicine

Springer-Verlag

Much more than you might expect. The field you work in is also related to nature's time cycles! To what extent is made clear by an impressive group of international experts in this unique new book.

The physiology, pathophysiology and pathology of the human time structure are described in detail. Against this background, the clinical importance of time-dependent phenomena for diagnosis and treatment is discussed.

Besides cellular, molecular and genetic aspects of chronobiology, the role of biologic rhythms in hematology, oncology, endocrinology,

internal medicine, and occupational medicine is reviewed in 46 informative chapters.

From the contents:

- Principles of Clinical Chronobiology
- Chronopharmacology
- Chronotoxicology
- Biological Rhythms and Aging
- Night and Shift Work and Transmeridian and Space Flights
- Biological Rhythms in Hepatic Drug Metabolism
- Renal Excretion: Rhythms in Physiology and Pathology
- Chronochemotherapy of Malignant Tumors
- Rhythms on Tumor Markers
- Chronobiology in Laboratory Medicine
- Chronobiology of: Pregnancy; Mental Performance; Physical Performance and Sports Medicine; Sleep and Sleep Disorders; Gastrointestinal System; Immune Functions; Circulating Blood Cells and Platelets

1992. Approx. 800 pp.
333 figs. 54 tabs.
Hardcover DM 298,-
ISBN 3-540-54461-5
